

Online promotional materials - program description

Please feel free to use this text to promote Clear Pronunciation to your students.

Speaking practice can be extremely difficult. It can be confusing and sometimes rude when you mispronounce a word so it is important to fix it. Clear Pronunciation teaches you the 43 sounds of English: you will learn the full range of sounds by themselves, in words, sentences, and in larger texts.

Using these online materials, you will learn through sound clips, video clips, and a range of activities that make sure you cover all the skills you need. Listen, learn, practise, and compare. With the Clarity Recorder, you can practise sounds, words, or sentences and compare your pronunciation with native speaker examples.

But Clear Pronunciation isn't about copying the accents of native speakers exactly. Learn from other English learners like you. You will hear a range of accents from people all over the world — hear the sounds in action from English speakers in daily situations and conversations.

Access Clear Pronunciation wherever and whenever you need it on your desktop or your mobile. Easy access means you can plan your practice and check your progress as you go through the program. Take a look at the introductory video here — a preview of what is to come! Start learning with Clear Pronunciation to speak clearly with confidence.
